

SINGLE-USE ELECTRONIC SECURITY SEAL FS-22011

This disposable high security electronic seal is dedicated for:

- Sealing ISO shipping containers
- Rail road wagons
- Cargo trailers

It was designed to comply with ISO 17712-2013 standard for HS (high Security) type seals and is equipped with a patented fiber optic integrity monitoring system, GPS receiver, GSM cellular transceiver and 11 Ah primary battery.

MAIN ADVANTAGES

- Continuous monitoring the integrity of the seal from the place of container loading to the place of it's discharge (door-to-door visibility)
- Complies with the requirements of ISO 17712-2013, which makes it the legal evidence for the shipper, forwarder, carrier, consignee, police, commercial arbitration and insurance company.
- Ability to operate up to 90 days (one message every 2 hours)
